Dear Ladies and Gentlemen:

Today we would like to inform you about two updated guidelines:

First, the guideline 2011/65/EU (RoHS 2-guideline) to avoid hazardous substances (cadmium, lead, etc.) in electric and electronic products. Secondly, the guideline 2012/19/EG (WEEE-guideline) for the secured return of "Waste Electrical and Electronic Equipment" and there correct disposal.

With enforcement of the **ElektroStoffVerordnung** (German regulation) since 9 May 2013, the requirements of RoHS 2 are valid. The **ElektroGesetz** (German law) enforces the guideline.

In the application field of the ElektroStoffVerordnung all new electric and electronic products are included (additionally cables and spare parts), except when they fall under the case of exceptions § 1 par. 2 ElektroStoffV.

This is valid from 22 July 2017 for industrial surveillance and control devices, or appropriately from 22 July 2019 for other electric and electronic products.

But already today D+H Mechatronic AG is focused on producing its products RoHS 2 conform and furthermore, to avoid the implementation of dangerous substances consequently.

With best regards

D+H Mechatronic AG

Executive Board
Thomas Kern
