

product type designation

product description

M12, 8 pin, male, straight

Connector M12 (pin) with screw terminal and PG fitting

RF connector M12 8-pole, male, straight, Screw terminal minimum order quantity 5 units.

suitability for use

For communication module ASM 456, RF160C, RF170C, RF180C, RF182C, RFID 181EIP

interfaces

number of electrical connections

- for network components or terminal equipment

1

type of electrical connection

- for network components or terminal equipment

M12 connector (male insert, 8-pin, A-coded)

mechanical data

material / of the enclosure

plastic PA

locking mechanism design

Screwed joint

number of poles

8

tightening torque / for contacts / with screw-type terminals

0.2 ... 0.2 N·m

tightening torque / for M12 round connector / maximum

0.6 N·m

connector coding / of the M12 circular connector

A

design, dimensions and weights

type of cable outlet

180° cable outlet

width

20.2 mm

height

20.2 mm

depth

54 mm

net weight

30 g

connectable cable cross-section

6 ... 8 mm

connectable conductor cross-section

0.75 mm²

- solid

0.2 ... 0.5 mm²

- finely stranded / with core end processing

0.2 ... 0.5 mm²

ambient conditions

ambient temperature

- during operation
- during storage
- during transport

-40 ... +85 °C

-40 ... +85 °C

-40 ... +85 °C

protection class IP

IP67

standards, specifications, approvals

certificate of suitability

- UL approval

Yes

security information

Siemens provides products and solutions with industrial security functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial security concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial security measures that may be implemented, please visit <https://www.siemens.com/industrialsecurity>. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Security RSS Feed under <https://www.siemens.com/cert>. (V4.6)
