

product type designation

product description

IE RJ45 Port Lock

RJ45 port lock

IE RJ45 port lock RJ45 port lock with keys for mechanical locking of RJ45 ports 1 pack = 1 unit.

suitability for use

for mechanical closing of unused RJ45 ports

interfaces

number of electrical connections

- for Industrial Ethernet FC TP cables
- for network components or terminal equipment

0
1

type of electrical connection

- for network components or terminal equipment

RJ45 connector

type of electrical connection / FastConnect

No

mechanical data

material / of the enclosure

plastic

design, dimensions and weights

type of cable outlet

180° cable outlet

width

11.7 mm

height

15.6 mm

depth

32.2 mm

net weight

0.01 g

ambient conditions

ambient temperature

- during operation
- during storage
- during transport

-20 ... +60 °C
-20 ... +60 °C
-20 ... +60 °C

protection class IP

IP20

product features, product functions, product components / general

product feature

- PoE capability
- PoE+capability
- silicon-free

No
No
Yes

product component

- strain relief

No

standards, specifications, approvals

certificate of suitability

- RoHS conformity
- UL approval
- cULus approval
- railway application in accordance with EN 50155

Yes
No
No
No

reference code

- according to IEC 81346-2:2019

XGA

security information

security information	Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
