

product description

M12 adapter with degree of protection IP65

IE adapter M12-X/M12-D; Cat5e; M12 D-encoded socket to M12 X- encoded pin;
for easy connection of M12 interfaces with D and X coding; 1 pack = 1 unit;

suitability for use

adapter (passive) for connecting 4-wire M12 cables (100 MB) to 8-wire M12 interfaces on active components

transfer rate

transfer rate / for Industrial Ethernet

10 Mbit/s, 100 Mbit/s

interfaces

number of electrical connections

- for Industrial Ethernet FC TP cables
- for network components or terminal equipment

4

1

type of electrical connection

- for network components or terminal equipment

M12 X male/M12 D female

mechanical data

material / of the enclosure

metal

locking mechanism design

Screwed joint

tightening torque / for M12 round connector / maximum

0.6 N·m

connector coding / of the M12 circular connector

D / X

design, dimensions and weights

width

15 mm

height

15 mm

depth

56 mm

net weight

30 g

ambient conditions

ambient temperature

- during operation
- during storage
- during transport

-25 ... +85 °C

-25 ... +85 °C

-25 ... +85 °C

protection class IP

IP67

product features, product functions, product components / general

product feature

- PoE capability
- PoE+capability
- silicon-free

Yes

Yes

Yes

standards, specifications, approvals

certificate of suitability

- RoHS conformity

Yes

standard for structured cabling

Cat5e

reference code

- according to IEC 81346-2:2019

XGA

security information

security information

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under <https://www.siemens.com/cert>. (V4.7)
